Comm 2216

Week 1: Intro, Outline, and Job Search

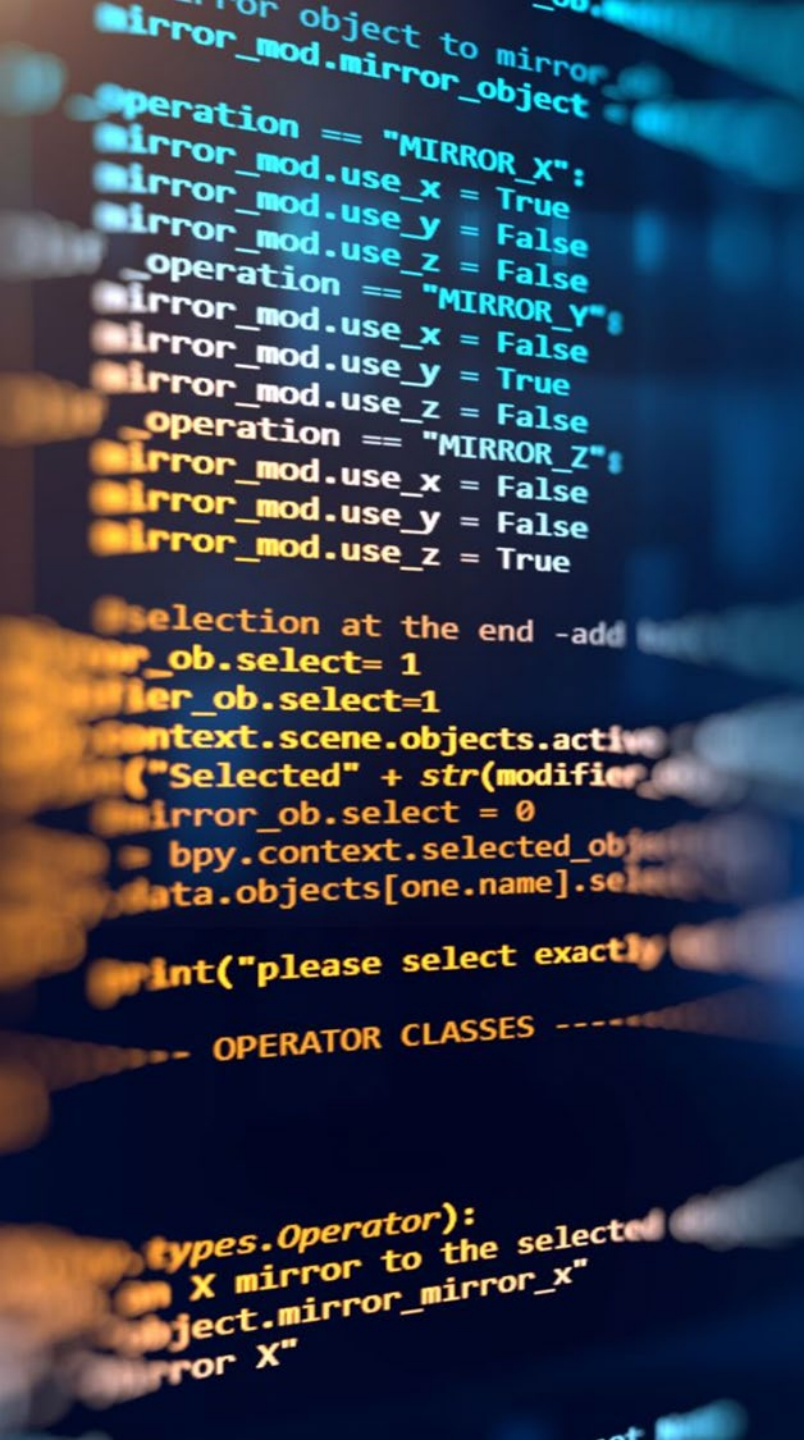

Week 1: Outline

- Term overview
- First module: job search
 - Myth of the experience trap
 - Finding job openings
 - A warning about social media
 - Information interviews and networking

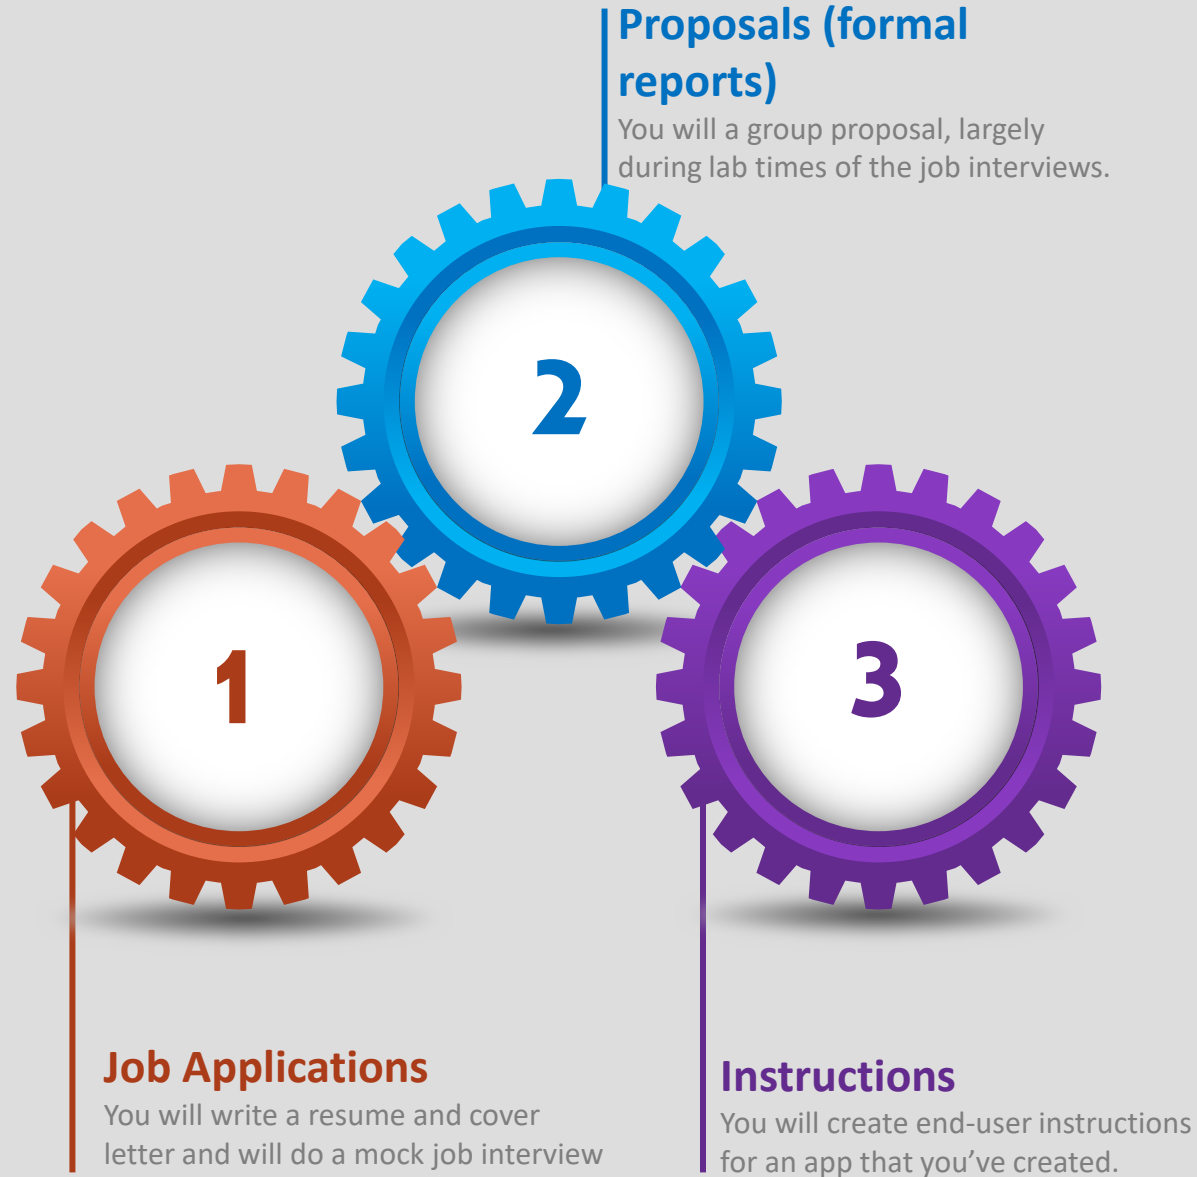

Thorsten Ewald

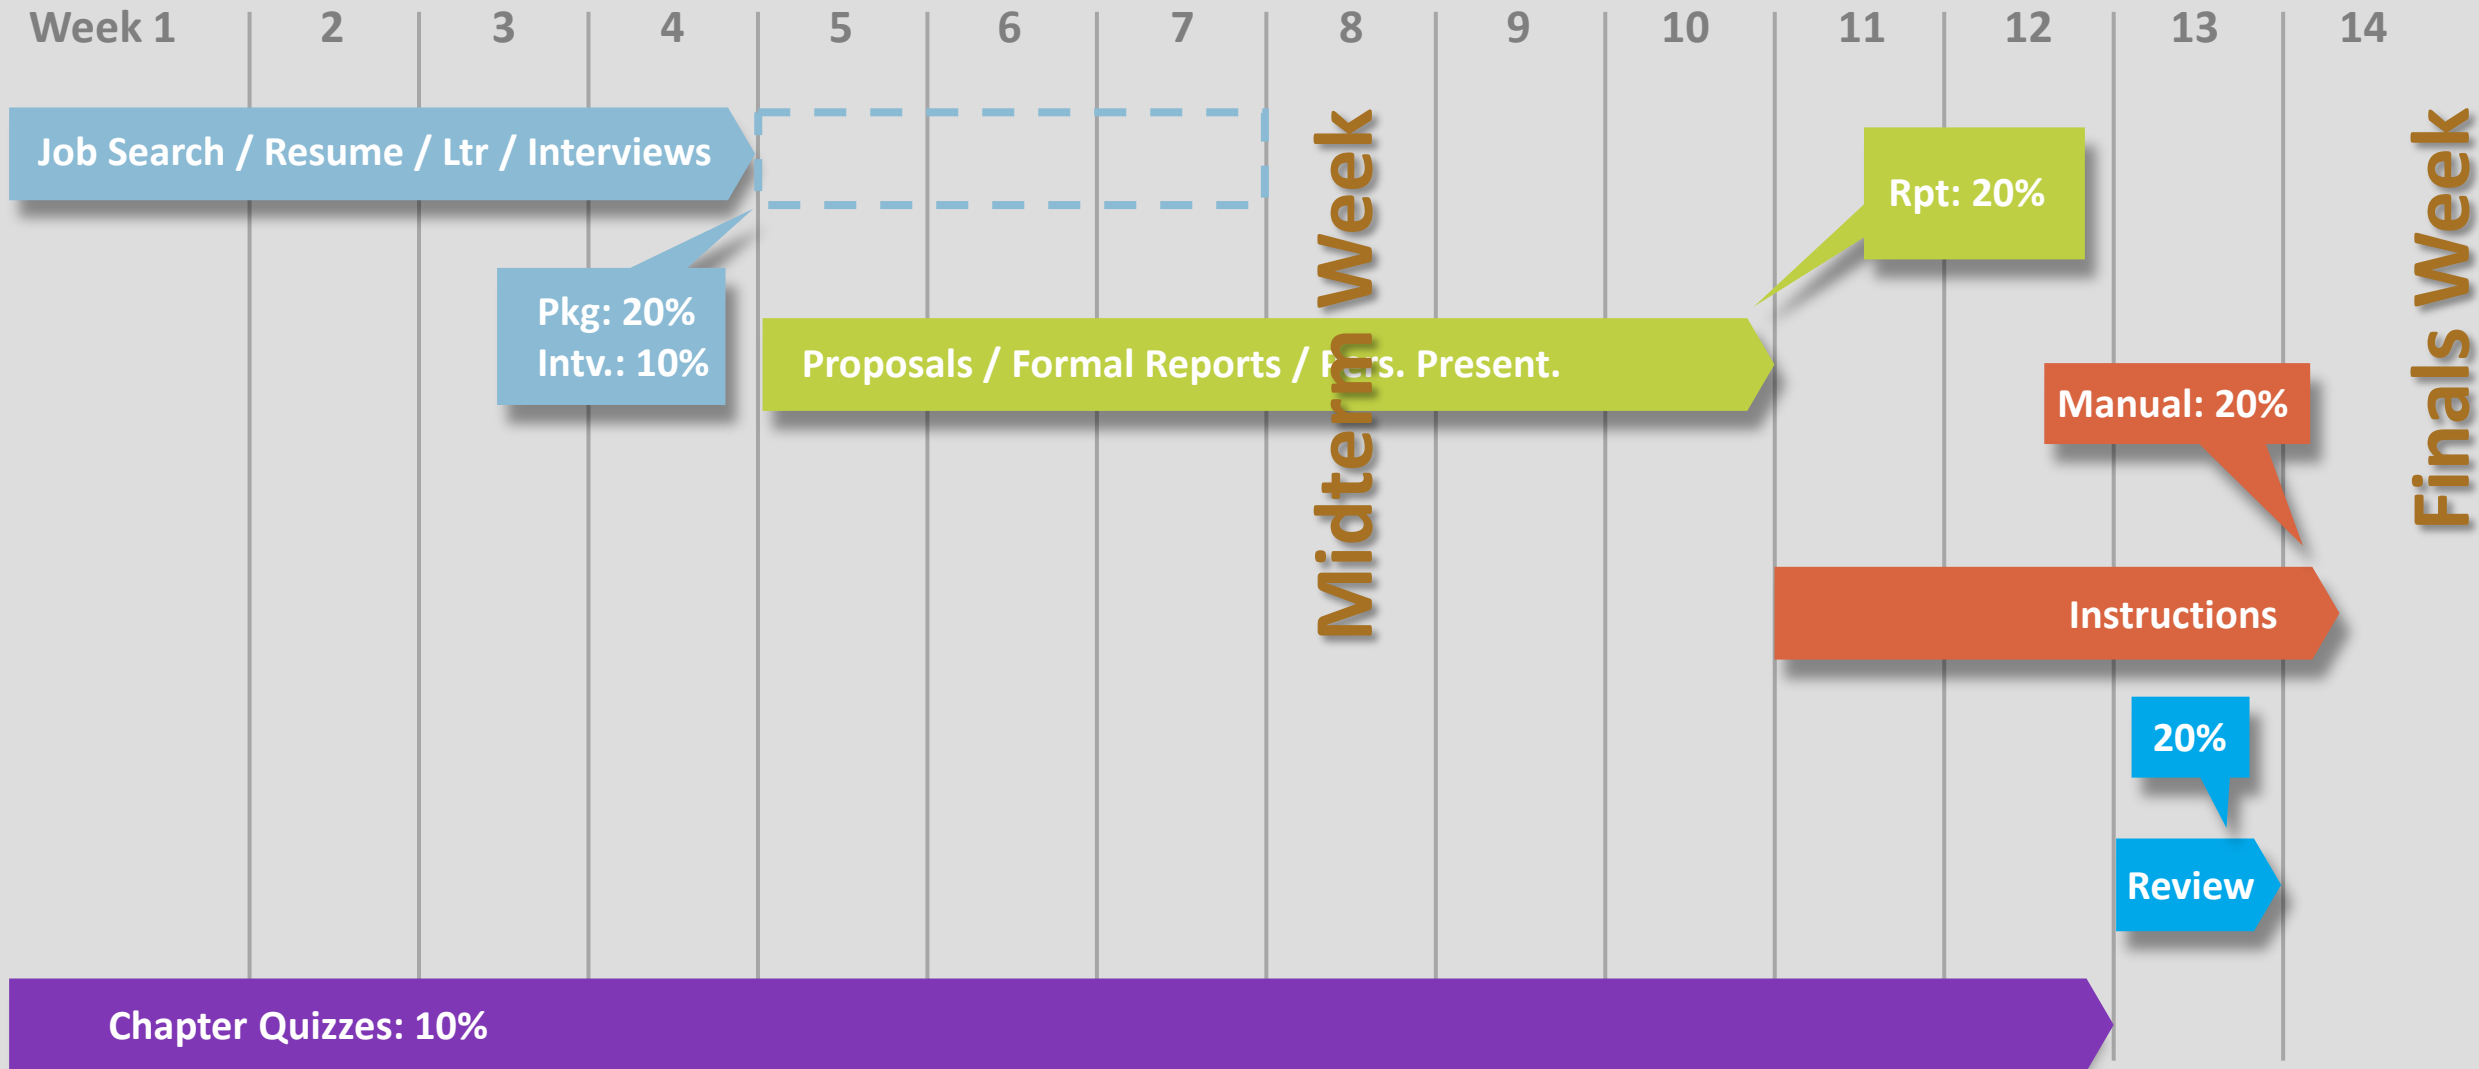

- SW2-239
- Thorsten_Ewald@bcit.ca
- Office hours: Tues.: 12:30-1:20
 Thurs.: 12:30-1:20
 Fri: 10:30-3:20
It's best to let me know ahead of time. Sorry.
- Or just send me an email with questions or a request for a quick Team meeting
- And, of course, I'm available before, during, and briefly after lectures and labs

Term Overview

Course Schedule

Grading Scheme Summary

Chapter Quizzes: 10%

Resume / cvr ltr: 20%
Job interview: 10%

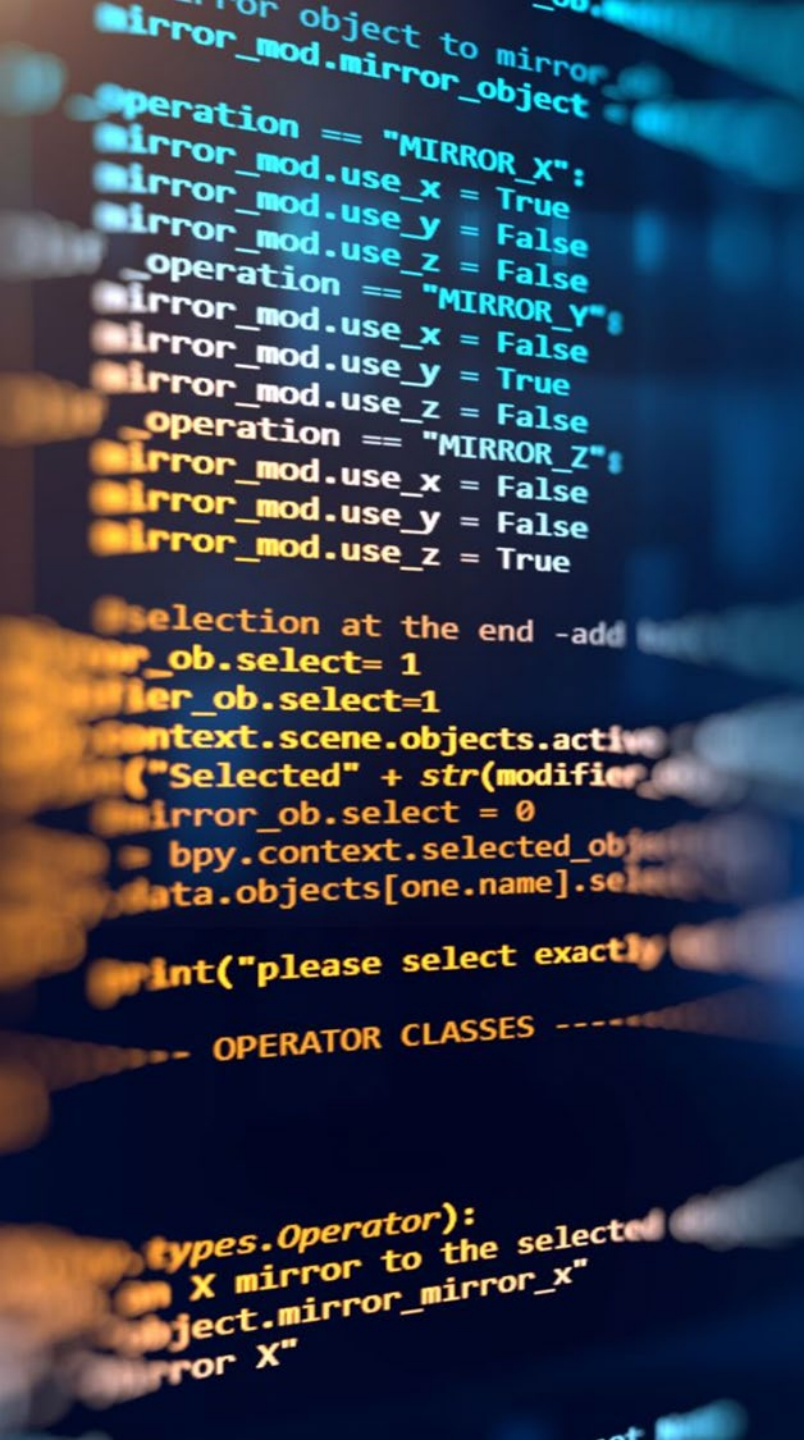

Formal proposal: 20%

Instruction Manual: 20%

Review Test: 20%

Week 1: Outline

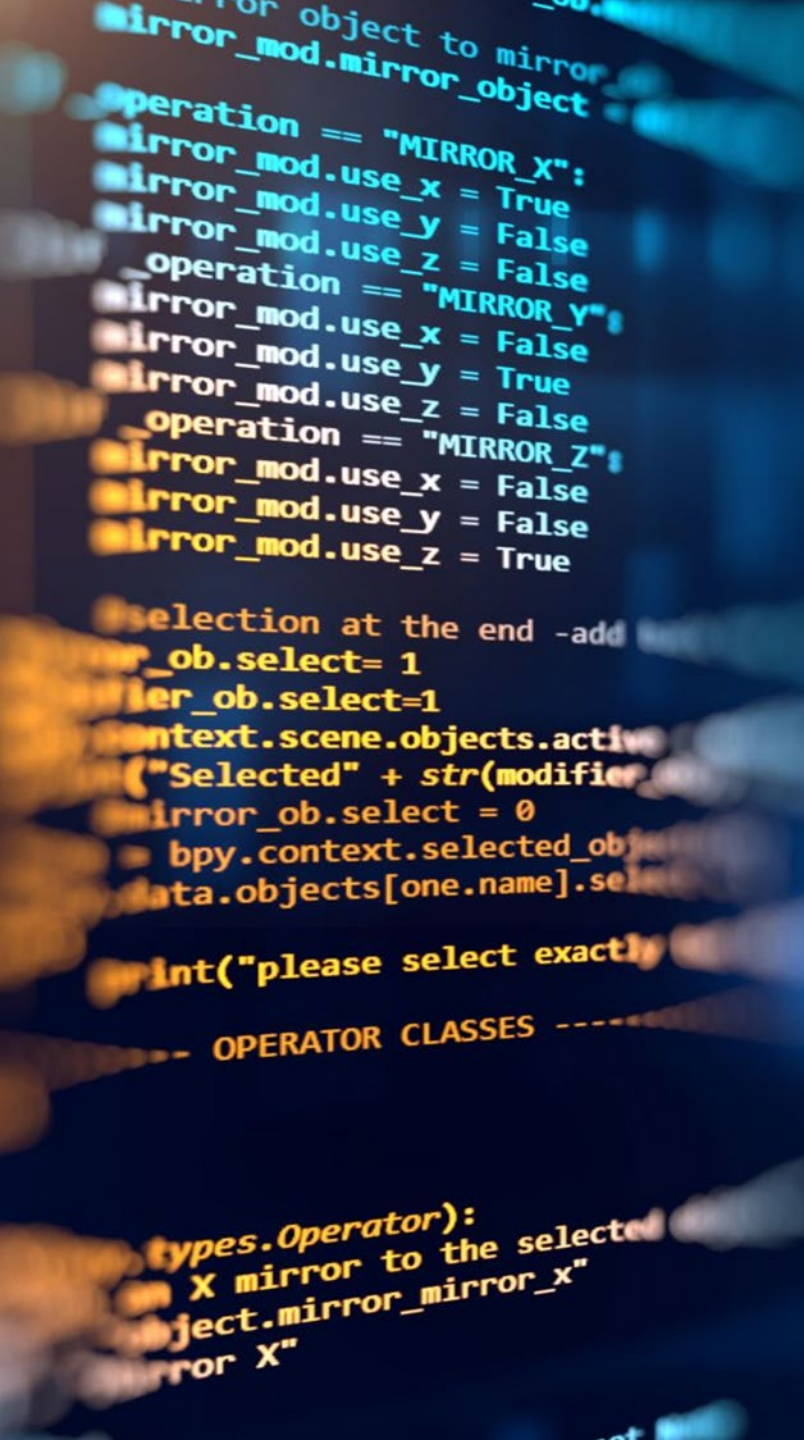

- Term overview
- **First module: job search**
 - Myth of the experience trap
 - Finding job openings
 - A warning about social media
 - Information interviews and networking

Jobs don't always go to the most qualified person, but to the person who markets themselves best—or interviews best.

Myth of the Experience Trap

- Many worry about it.
- Employers say they want to hire people with experience.
- But if you can't get a job, how do you get experience?
- Don't worry about it.
- Every year, the Canadian economy absorbs hordes of recently graduated first-timers with absolutely no experience.
- Just don't expect to be paid top dollar or to get the ultimate job satisfaction right out the gate.

You should, however, research and plan your career

Find out all you can about the industry, companies & individuals (use websites such as T-net, techvibes, BC Tech Association)

Research successful companies and people (company websites, LinkedIn)

Try to have some idea of what will happen next in the industry (techmeme.com, slashdot.org, gamedeveloper.com)

Develop company profiles

Every company has its culture, so try to understand it

Establish what that culture is:

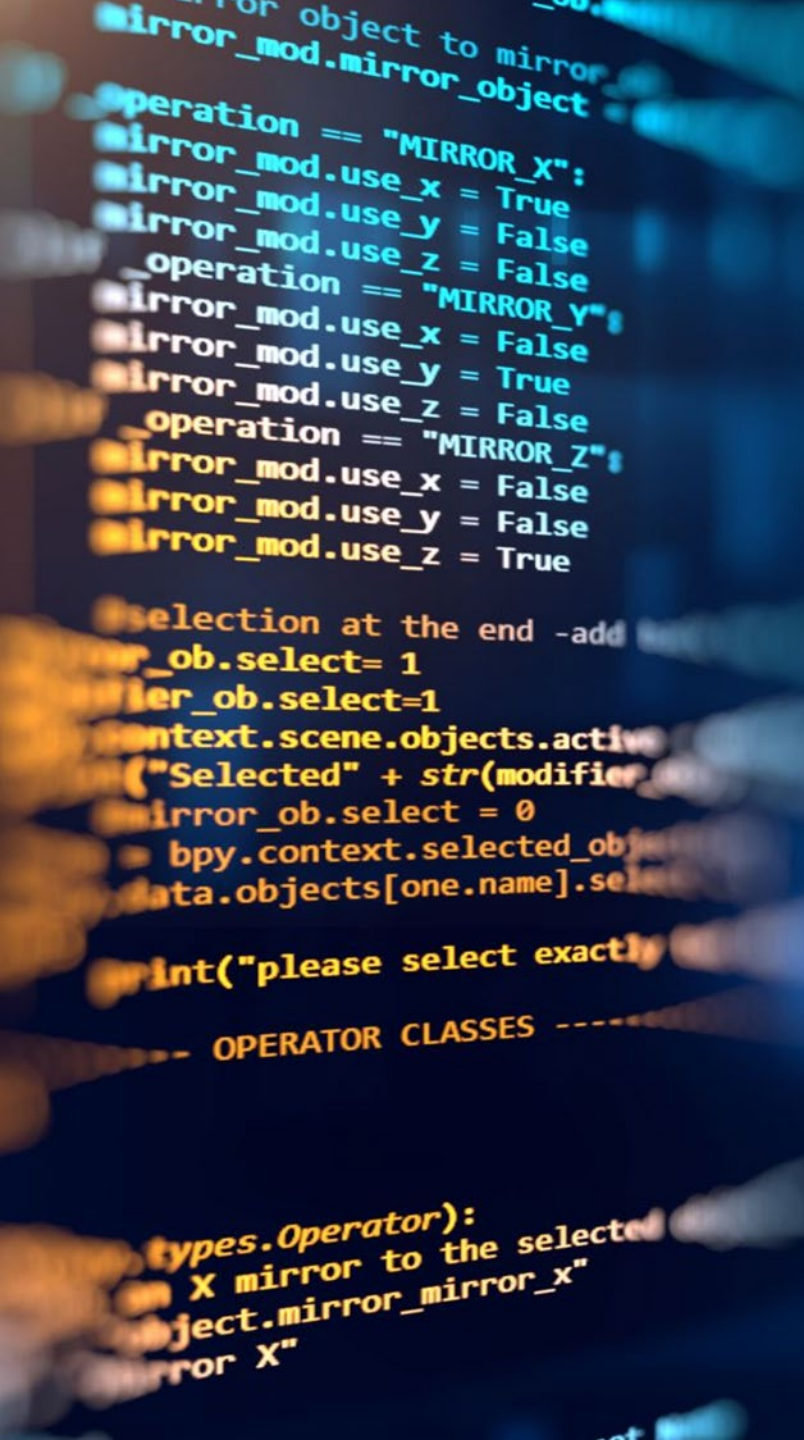

- is it a small, medium or large company?

- what image does it project?

- what are its areas of specialization?

- how would you fit in?

Decide why you want to work for them and why they would want to hire you

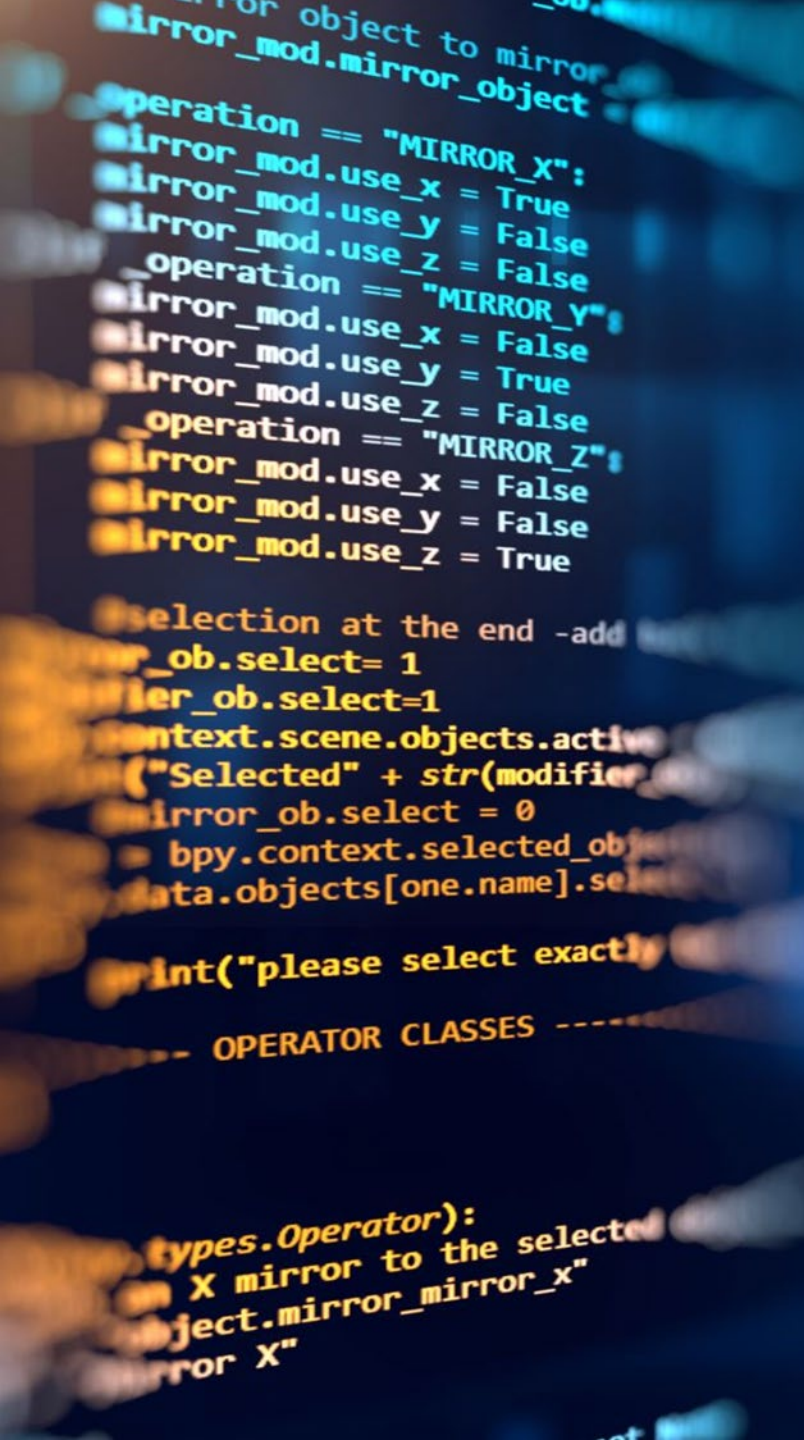

Organize a contact database

Memory is fallible, so keep a written record

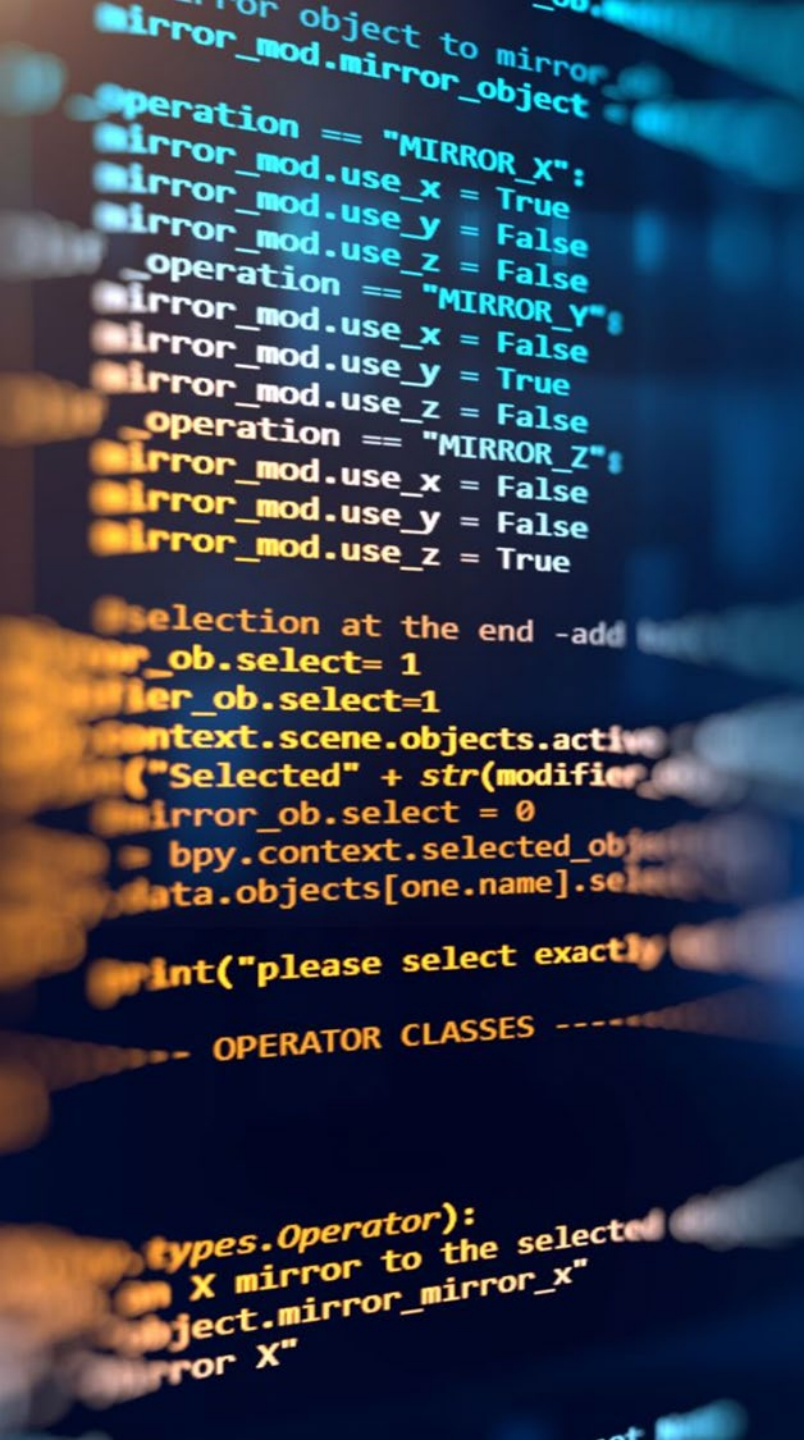

Keep a file on all contacts made, applications and companies, etc.

Record dates, calls made, a folder for emails, and notes on what you've said/done and on the individuals/companies you meet and the projects they mention

Week 1: Outline

- Term overview
- First module: job search
 - Myth of the experience trap
 - Finding job openings
 - A warning about social media
 - Information interviews and networking

Finding job openings

Advertised openings

- Most companies advertise on their websites, often exclusively.
- Bookmark the companies that interest you and visit their “Opportunities” pages frequently.
- Subscribe to receive notices when opportunities come up.

Finding job openings

Advertised openings, cont'd

- Visit job search sites: monster.ca, find-a-job-canada.com, etc.
- Put in your desired job designation and geographic parameters and see what comes up.
- Subscribe to receive notifications when jobs meeting your search parameters become available.
- Research the company a bit first; try to find out the name of the person who is doing the hiring.
- 'Send' a résumé and application letter to the company.

Finding job openings

Advertised openings, cont'd

- Follow-up is generally discouraged because the company is receiving so many applications.
- That's the major drawback of applying for advertised jobs: massive competition.

Finding job openings

Unadvertised openings

- Most jobs in Canada (around the world, in fact) are filled without ever being advertised. That's a good thing!
- Find a company for which you might like to work.
- Try to find the name of the person who does the hiring; a personal salutation is always a nice touch.

Finding job openings

Unadvertised openings, cont'd

- 'Send' a résumé and application letter.
- In a week or so, place a follow-up phone call or, second choice, email.
- Ask if they've received your application, whether they'll keep it on file, or whether they know of any place else that might be hiring.
- The advantages of unsolicited applications:
 - Kept on file, they are the first to be looked at when the company has to do some hiring. If they have enough qualified applicants on file, they don't advertise.
 - If you've called, you already have a personal connection.

Week 1: Outline

- Term overview
- First module: job search
 - Myth of the experience trap
 - Finding job openings
 - A warning about social media
 - Information interviews and networking

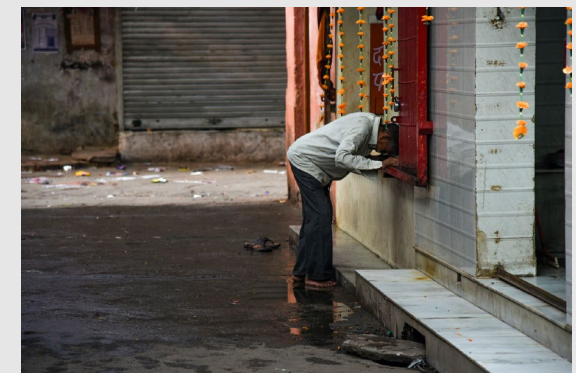

Social Media

- Use Facebook and, especially, LinkedIn to make contacts and place queries about job openings.
- Be aware that prospective employers will check your social media pages.
- Clean them up a bit to look more professional.
- Be aware also that it's not just your pages that count, but also the photos of you that have been posted on your friends' pages.

Social Media

- Use Facebook and, especially, LinkedIn to make contacts and place queries about job openings.
- Be aware that prospective employers will check your social media pages.
- Clean them up a bit to look more professional.
- Be aware also that it's not just your pages that count, but also the photos of you that have been posted on your friends' pages.

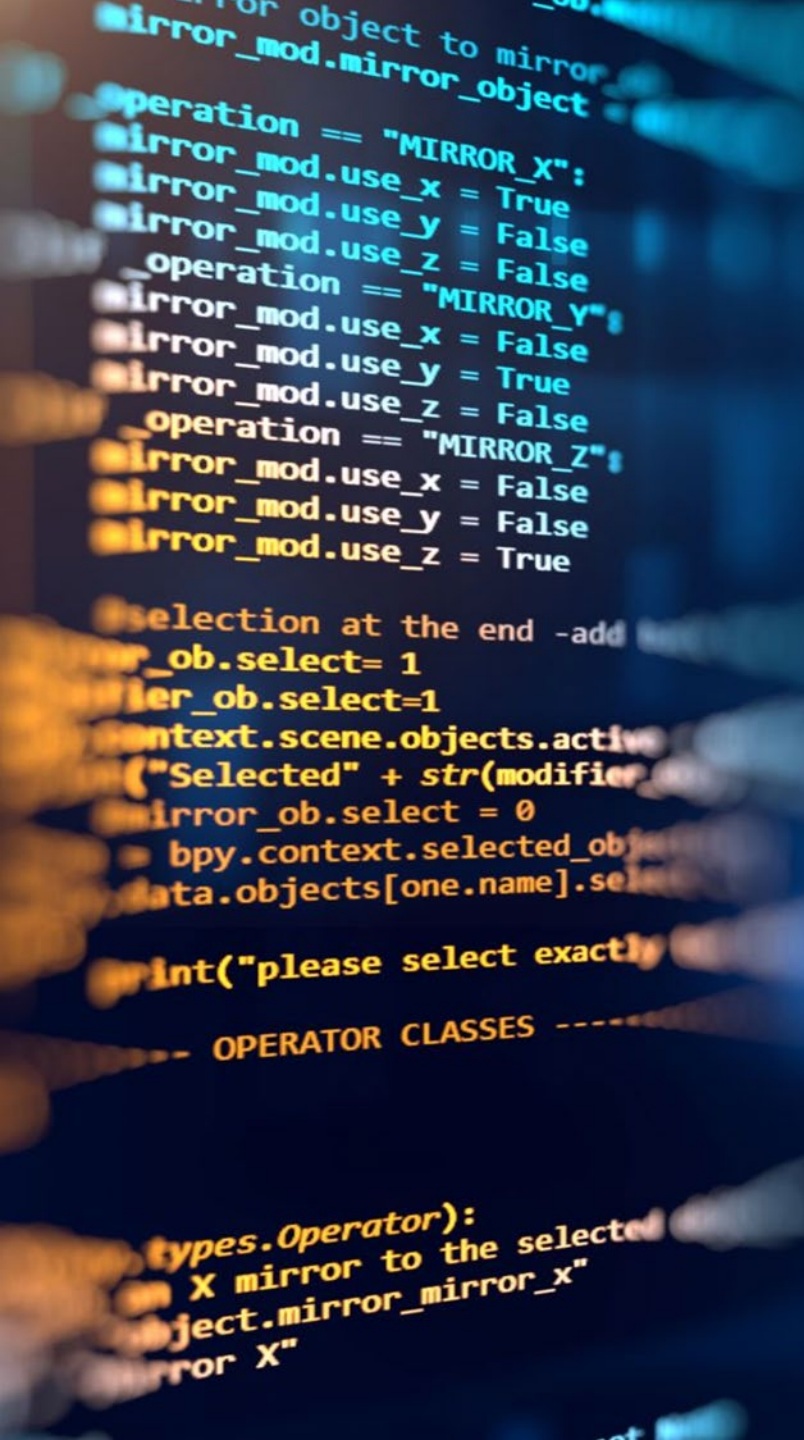

Week 1: Outline

- Term overview
- First module: job search
 - Myth of the experience trap
 - Finding job openings
 - A warning about social media
 - Information interviews and networking

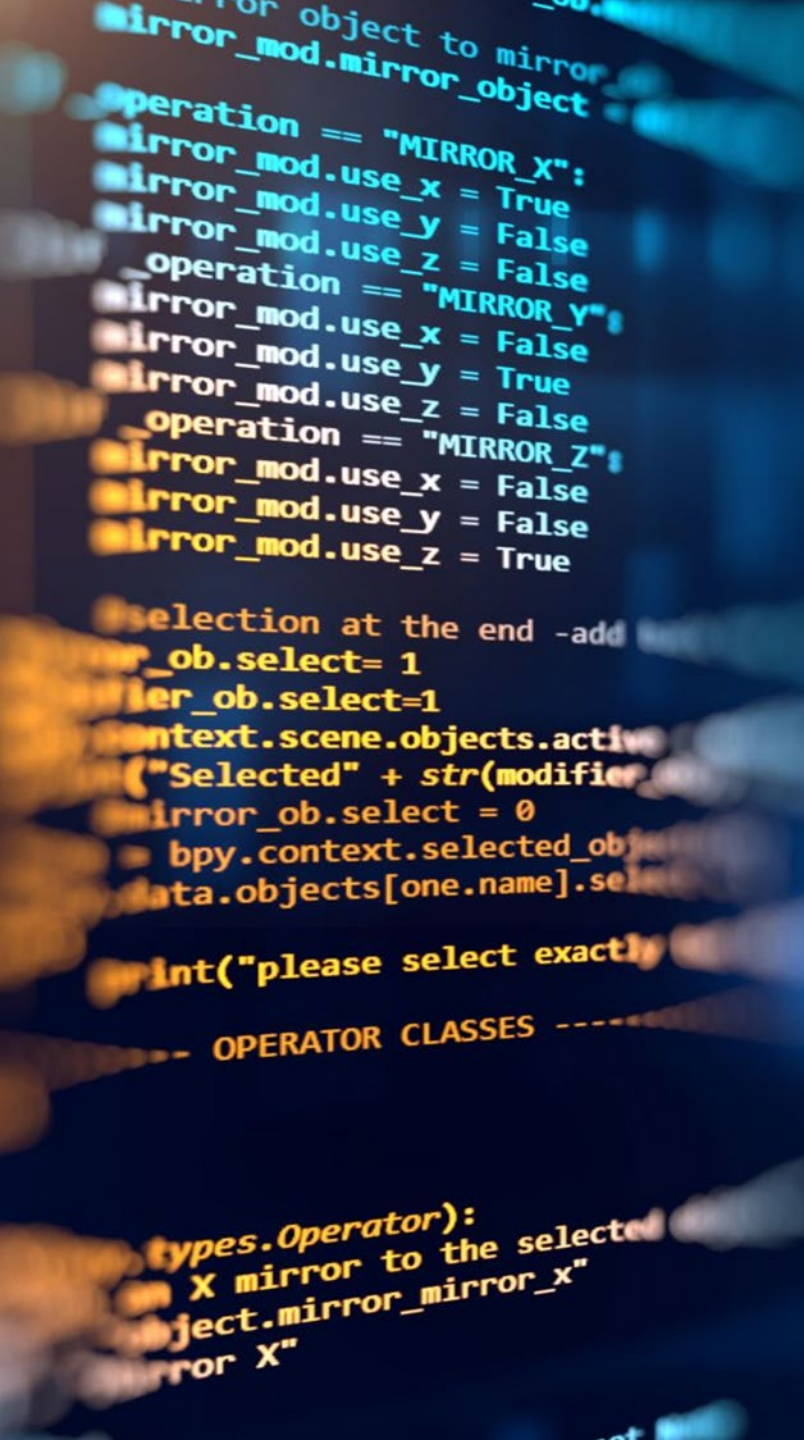

Information Interviews

- An interview between you and a more experienced person in your field.
- Good way to get information and to build contacts.
- Ask for an information interview when you follow up on an unsolicited application, for instance.
- Or make a blind call, though that's outside most people's comfort zone.

Information Interviews

- Be friendly, professional, interesting. Treat it like a job interview, because it is.
- If a job comes up, your interviewee will remember you favourably.
- Develop contacts and get leads.
- Danger: when you ask for an interview, the interviewee might offer to do one immediately over the phone or via Zoom.
- Make sure you have intelligent questions prepared: job chances, upcoming technologies and trends, how can I build out my resume, etc.

Making contacts: who is your network?

Potentially anybody and everybody in the industry

More specifically: work contacts, mentors, instructors, fellow students, friends

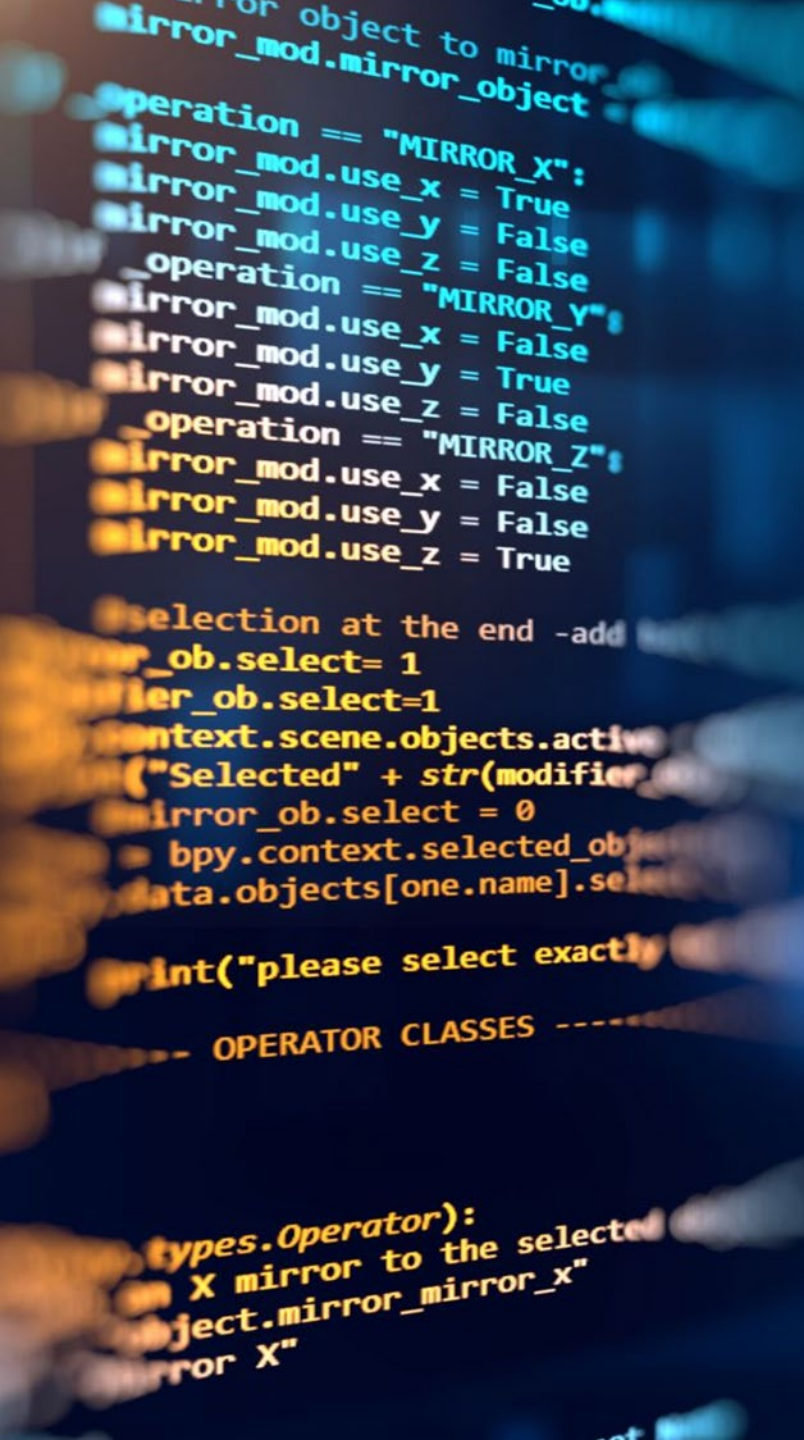

Meetups, hackathons, Tech Industry Days, LinkedIn, people at your co-op placement, etc.

When you are looking:

- Let your contacts know

- Be specific about what jobs/careers you want

- More contacts = more opportunities

BCITSA events and activities

Hackathons

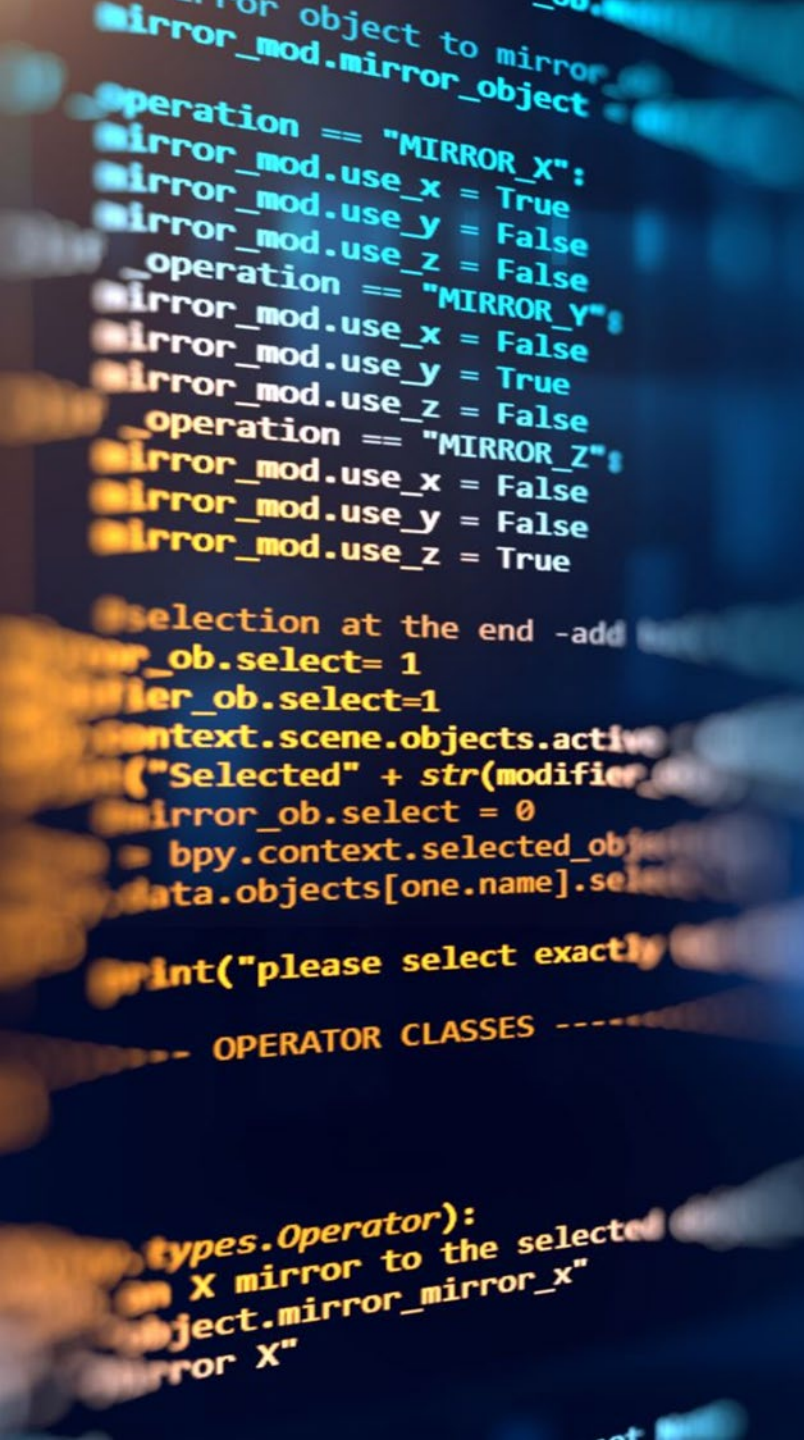

Tech Industry Days

Professional Headshot day (and LinkedIn help)

Resume and Cover Letter support

Career Edge Program

Check for other professional development opportunities put on by the BCITSA

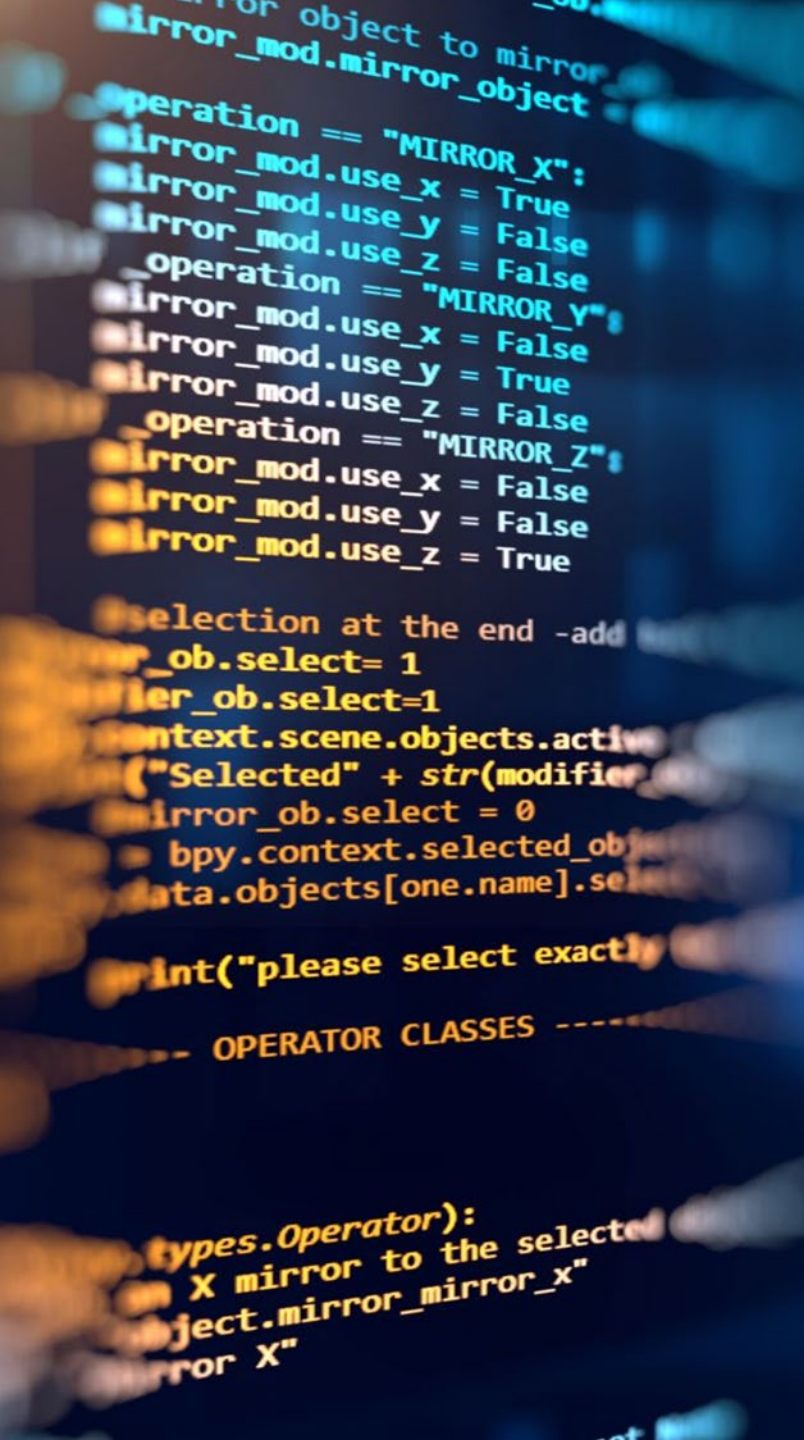

Market yourself consciously

You are the product you're selling

Identify your strengths and emphasize them

The person who gets the job is the one who best communicates what they can do for that employer

Clearly emphasize how you can contribute to their success

Finally: learn to shrug off rejection

Rejection and failure are necessary for success

If you're not being rejected, you're not applying enough

It's a numbers game

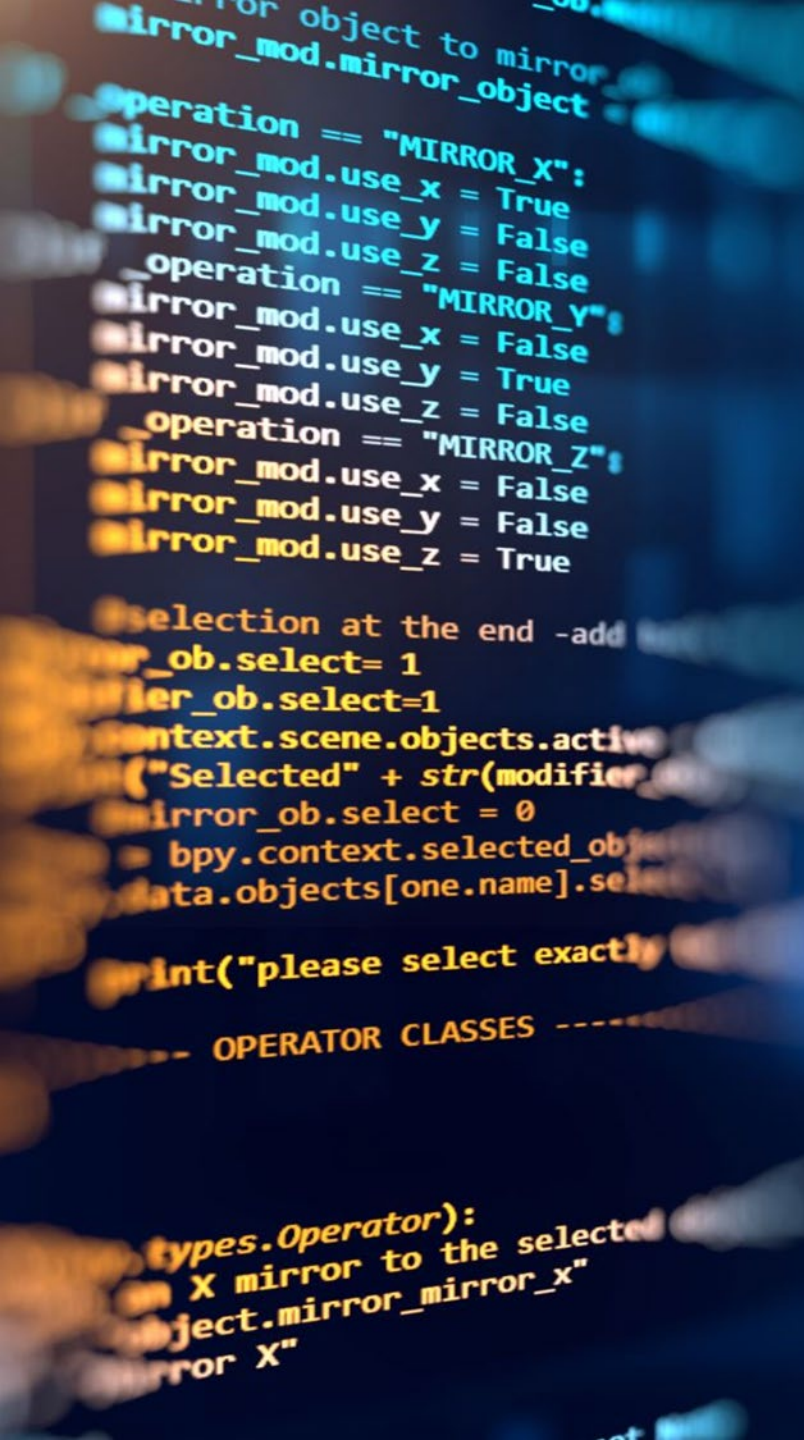

The only way to succeed is to go through all the NOs until you finally hear YES

Homework for Week 1

Lecture

Read Chapter 16 of the textbook and do Chapter 16 Quiz in the Quiz section of the Activities tab in D2L.

Quiz deadline is 23:59 on Sunday, September 14.

Questions?
